## Series 12.010.300 /~.500

12.010.500

12.010.300

## Characteristics

- replaceable filter elements, easy to clean
- easy to assemble
- high flow rate
- medium temperature up to 90 °C
- operating pressure up to 10 bar
- various connections available

## Applications

- for protection of ...
- solenoid valves
  - sanitary fittings
  - flow meters
  - check valves
  - instantaneous water heaters

## Description

The treatment of drinking water by the use of mechanical acting filters and their design is regulated in DIN EN 13443.

The upstream mounted strainer will protect taps and other equipment against damages or malfunctions caused by suspended particles.

There is no need to disassemble the strainer nor tool to replace the filter insert. It is recommended to mount the strainer with the filter insert pointing downwards, to avoid that collected dirt remains in the housing, during replacement of the insert.

Type 12.010.300 is intended to be used for applications, in which valves, ball valves or others are already installed for use as shut off devices during replacement of insert.

Type 12.010.500 integrates a shut off flow capability. The strainer is forcibly closed and an upstream shut off device is not required.

typical performance curve

# Product Information

Strainer, DN 10

## Series 12.010.300 /~.500

**12.010.300**  
no shut off capability

1) Groove for flange

## Technical Data

Type	strainer	
Construction	mechanical filter	
Fitting position	preferably filter element pointing downwards	
Media	cold and heated potable water and physically and chemically similar media	
T-Medium	90	°C max.
DN	10	mm
p-Operating	10	bar max.
Admissible pressure loss	6	bar max.
Cv-value	20	l/min
12.010.300	17	l/min
12.010.500		

## Materials

Body / inner parts	PA 66 others on request/ stainless steel
Seals	EPDM
Filter	stainless steel PA 66
Mesh size / wire diameter	0,16 mm / 0,08 mm Ø 0,25 mm / 0,10 mm Ø

## Options

Material	Inlet	A1	L1	Outlet	B1	L2	L	
	Ø A			Ø B
